

Electronic Health Information (EHI) Export

Kantime Health supports the export of electronic health information (EHI) based on user roles for both clinical and billing data.

Single or Multi-Patient EHI Export

Users who have access to EHI export authorization will be able to export clinical data using the CCD A 2.1 Release 2 standard.

The billing user role will facilitate the process for users to extract patient claims and payments in CSV format export.

Exported File Formats

- Clinical data is exported as CCD A 2.1 Release 2 USCDI v1.
- Billing data is exported as CSV, XLSX or PDF.
